```c
#include<stdio.h>
void rotateLeft(int source[],int k,int size)
{
    int j,m;
    for(j=0;j<k;j++)
    {
        int first=0,second=first+1;
        int temp=source[0];
        for(m=0;m<size;m++)
        {
            source[first]=source[second];
            first=(first+1)%size;
            second=(first+1)%size;
        }
        source[size-1]=temp;
    }
    for(m=0;m<size;m++)
    {
        printf("%d,",source[m]);
    }
}
int main()
{
    int size,k,i;
    printf("Enter Array Size= ");
    scanf("%d",&size);
    int source[size];
    printf("\nEnter Array Elements= ");
    for(i=0; i<size; i++)
```

```c
    {
        scanf("%d",&source[i]);

    }
    printf("\nEnter 'k' positions= ");

    scanf("%d",&k);

    rotateLeft(source,k,size);

    return 0;
}
```
